

The Creamy Revolution

Whipped Cream Desserts, Variations, and More

PAYMANA

FACTS, HEALTH BENEFITS, AND USES OF RECIPES

Whipped cream dispensers, also known as cream whippers or whipped cream makers, have been around for over a century, and their popularity continues to grow. These devices are used to create whipped cream, which is a delicious and versatile topping for desserts and beverages. But did you understand that there are a lot of interesting trivia and benefits to your health associated with whipped cream dispensers, as well as numerous ways to use them in recipes beyond whipped cream? Let's explore!

Fun Facts:

The first whipped cream dispenser was invented in 1882 by a New Jersey dentist named Thomas Patton. Whipped cream dispensers were originally created for the medical industry, as they were used to dispense nitrous oxide for pain relief during dental procedures.

Whipped cream dispensers were first used in restaurants and bakeries in the 1950s, and they became popular for home use in the 1970s.

The most popular type of gas used in whipped cream dispensers is nitrous oxide, also known as laughing gas.

Whipped cream dispensers are also used in molecular gastronomy to create foam and other textures in foods.

Health Benefits:

Whipped cream made from scratch using a Paymana whipped cream dispenser is typically lower in calories and sugar than store-bought whipped cream, as you can control the ingredients.

Whipped cream made with our whipped cream dispenser is fresher and contains fewer preservatives than store-bought whipped cream.

Whipped cream made with a Paymana whipped cream dispenser can be made with organic ingredients, making it a healthier option.

Whipped cream contains dairy, a good calcium and protein source.

Portion control: *Using Paymana whipped cream dispenser can help you control the amount of whipped cream or other toppings you use on desserts and drinks, making it easier to practice moderation in your diet.*

Lower sugar content: *Store-bought whipped cream can be high in sugar and other additives, but making your own with our whipped cream dispenser allows you to control the sweetness level. You can also use alternative sweeteners like honey or maple syrup to create a lower-sugar whipped cream.*

Better quality ingredients: *By making your own whipped cream, you have control over the quality of your ingredients. You can choose to use organic dairy or dairy-free alternatives like coconut cream, which can be a healthier option for some people.*

Source of calcium: *If you choose to use dairy cream in your whipped cream dispenser, you'll get a calcium source. Many people need to consume more calcium in their diets, even though calcium is essential for maintaining healthy bones.*

Versatility: While whipped cream is a classic use for a Paymana whipped cream dispenser, you can also use it to create a variety of other toppings and sauces. For example, you can make flavored syrups, infused oils, or frothed milk for coffee drinks.

It's important to note that while using our whipped cream dispenser can have potential health benefits, it's still important to use moderation and balance in your diet. Too much-whipped cream or other toppings can still be high in calories and sugar, so it's important to enjoy them in moderation as part of a balanced diet.

Using the Dispenser in Recipes:

In addition to whipped cream, you can use Paymana whipped cream dispenser to make foamed milk for coffee and other beverages.

You can also use our whipped cream dispenser to infuse oils with herbs and spices, which can be used in cooking and salad dressings.

Paymana whipped cream dispenser can make a homemade soda by combining carbonated water with flavored syrups or juices.

You can make the mousse, chocolate ganache, and other desserts using our whipped cream dispenser. Our whipped cream dispenser also can be used to create delicious and unique cocktails.

One popular recipe that can be made using our whipped cream dispenser is chocolate whipped cream. To make this recipe, combine heavy cream, cocoa powder, and powdered sugar in a whipped cream dispenser, then charge it with nitrous oxide. Shake the dispenser to combine the ingredients, and dispense the chocolate whipped cream onto your favorite desserts or beverages. This recipe takes about 5 minutes to prepare, and yields about 2 cups of chocolate whipped cream.

Another recipe that can be made using our whipped cream dispenser is foamed milk with caramel sauce. To make this recipe, heat milk, and caramel sauce in a saucepan, then pour the mixture into the dispenser and charge it with nitrous oxide. Shake the dispenser to combine the ingredients and dispense the foamed milk onto your favorite coffee beverages. This recipe takes about 10 minutes to prepare and yields enough foamed milk for several drinks.

DIABETIC-FRIENDLY WHIPPED CREAM

65
MIN

2 cups
SERVINGS

Ingredient

- 1 cup heavy whipping cream
- $\frac{1}{4}$ cup powdered erythritol or stevia
- 1 tsp. vanilla extract
- Whipped cream dispenser

Instruction

- Whisk the heavy whipping cream in a bowl with powdered erythritol/stevia and vanilla extract until well combined. Transfer the mixture to the whipped cream dispenser and seal it tightly. Charge the dispenser with one nitrous oxide cartridge.
- Shake the dispenser well for 10-15 seconds until the mixture is well combined and fluffy. Chill the dispenser in the fridge until ready to serve. Dispense the whipped cream onto your diabetic-friendly dessert and enjoy!

VEGAN WHIPPED CREAM

10
MIN

2 cups
SERVINGS

Ingredient

- 1 can of full-fat coconut milk, chilled for 4 hours
- 1-2 tbsp sugar powder
- ½ tsp vanilla extract (optional)
- Whipped cream dispenser

Instruction

- Open the coconut milk can and scoop the solid coconut cream that has risen to the top into a mixing bowl. Save the liquid coconut water for another use. Add powdered sugar and vanilla extract (if used) to the coconut cream mixing bowl.
- Use an electric mixer to beat the coconut cream until it's fluffy and forms stiff peaks. Transfer the coconut cream to the dispenser and seal it tight. Charge the dispenser with one nitrous oxide cartridge.
- Shake the dispenser well for 10-15 seconds until the mixture is well combined and fluffy. Chill the dispenser in the fridge until ready to serve. Dispense the whipped cream onto your favorite desserts, and enjoy!

ORGANIC WHIPPED CREAM FOR NATURAL DESSERTS

10
MIN

4
SERVINGS

Ingredient

- 1 cup of organic heavy whipping cream
- 2-3 tbsp. of organic brown sugar (or more, to taste)
- 1 tsp. of organic vanilla extract (optional)
- ½ cup of organic almond milk

Equipment:

- Whipped cream dispenser
- Whipped cream charger

Instruction

- Chill the whipped cream dispenser and whipping cream in the refrigerator for thirty minutes before starting. In a mixing bowl, combine the organic heavy whipping cream, organic brown sugar, and organic vanilla extract (if using).
- A whisk or electric mixer beat the ingredients until stiff peaks form. Pour in the organic almond milk and stir gently to combine. Transfer the mixture to the whipped cream dispenser. You can use a funnel to make this easier.
- Screw the lid of the whipped cream dispenser tightly. Charge the whipped cream dispenser with a whipped cream charger according to the manufacturer's instructions. Shake the whipped cream dispenser vigorously for a few seconds to mix the gas with the liquid.
- Dispense the organic dessert topping onto your favorite desserts such as fruit, pies, cakes, or hot beverages.

DARK CHOCOLATE WHIPPED CREAM

40
MIN

8
SERVINGS

Ingredient

- 1 cup heavy whipping cream
- 2 tbsp unsweetened cocoa powder
- 2 tbsp powdered sugar
- 2 tbsp. dark chocolate chips (melted in a microwave)

Equipment:

- Whipped cream dispenser
- Whipped cream charger

Instruction

- Chill the whipped cream dispenser and whipping cream in the refrigerator for thirty minutes before starting. Whisk the unsweetened cocoa powder, powdered sugar, and melted dark chocolate in a mixing bowl until well combined.
- Add the whipping cream to the bowl and beat with an electric mixer or whisk until soft peaks form. Transfer the mixture to the whipped cream dispenser. You can use a funnel to make this easier.
- Screw the lid of the whipped cream dispenser tightly. Charge the whipped cream dispenser with a whipped cream charger according to the manufacturer's instructions. Shake the whipped cream dispenser vigorously for a few seconds to mix the gas with the liquid.
- Dispense the chocolate whipped cream onto your favorite desserts.

MATCHA GREEN WHIPPED CREAM

70
MIN

8
SERVINGS

Ingredient

- 1 cup of heavy whipping cream
- 2 tbsp. of matcha green tea powder
- 2 tbsp. of powdered sugar
- 1 tsp. of honey

Equipment:

- Whipped cream dispenser
- Whipped cream charger

Instruction

- Chill the whipped cream dispenser and whipping cream for an hour before starting. Sift the matcha green tea powder and powdered sugar into a bowl. Add the whipping cream to the bowl and whisk with an electric mixer or whisk until soft peaks form.
- Add the honey and mix until well combined. Transfer the mixture to the whipped cream dispenser. You can use a funnel to make this easier. Screw the lid of the whipped cream dispenser tightly.
- Charge the whipped cream dispenser with a whipped cream charger according to the manufacturer's instructions. Shake the whipped cream dispenser vigorously for a few seconds to mix the gas with the liquid.
- Dispense the matcha green tea whipped cream onto your favorite desserts such as cakes, cupcakes, or fruit.

LAVENDER WHIPPED CREAM

40
MIN

8
SERVINGS

Ingredient

- 1 cup heavy whipping cream
- 1 tbsp. dried culinary lavender buds
- 2 tbsp. powdered sugar
- ½ tsp. almond extract (optional)
- Equipment:
- Whipped cream dispenser
- Whipped cream charger
- Fine mesh strainer

Instruction

- Chill the whipped cream dispenser and whipping cream in the refrigerator for thirty minutes before starting. In a non-stick saucepan, heat the heavy cream over low heat until it begins to steam. Remove the saucepan and add the dried culinary lavender buds.
- Let the lavender steep in the cream for about 5-10 minutes, then strain the mixture through a fine mesh strainer to remove the lavender buds. Add the powdered sugar and almond extract to the cream and whisk until soft peaks form.
- Transfer the mixture to the whipped cream dispenser. You can use a funnel to make this easier. Screw the lid of the whipped cream dispenser tightly. Charge the whipped cream dispenser with a whipped cream charger according to the manufacturer's instructions.
- Shake the whipped cream dispenser vigorously for a few seconds to mix the gas with the liquid. Dispense the lavender whipped cream onto your favorite desserts such as scones, shortbread cookies, or fruit.

DIARY-FREE COLD BREW COFFEE

40
MIN

8
SERVINGS

Ingredient

- 1 cup coarsely ground coffee beans
- 4 cups cold water
- 2-3 tsp. stevia sweetener
- ½ cup almond milk

Equipment:

- Large jar or pitcher
- Fine mesh strainer or cheesecloth
- Whipped cream dispenser (optional)

Instruction

- Add the coarsely ground coffee beans and the cold water to a large jar or pitcher. Stir the mixture until the coffee grounds are fully saturated. Cover the jar or pitcher with a lid or plastic wrap, and let it steep in the refrigerator for at least 12 or 24 hours.
- After the coffee has steeped, strain it through a fine strainer or cheesecloth to remove the coffee grounds. If you like the smoother texture, you can strain the coffee a second time through a coffee filter.
- If you want to add sweetener, mix it in with the coffee. If you want to add non-dairy milk or cream, pour it into the coffee. To make it a cold brew coffee foam, pour the cold brew coffee into a whipped cream dispenser and charge it with a whipped cream charger.
- Shake the dispenser vigorously for a few seconds to mix the gas with the liquid. Dispense the cold brew coffee foam on your favorite drinks or desserts.

MOUSSE

80
MIN

6
SERVINGS

Ingredient

- 8 oz. (225 g) bittersweet chocolate, chopped
- ½ cup (120 ml) heavy cream
- 4 large eggs separated
- ¼ cup (50 g) granulated sugar
- ¼ tsp. salt

Equipment:

- Whisker or hand mixer
- Whipped cream dispenser

Instruction

- In a heatproof bowl, melt the chopped chocolate with the heavy cream over simmering water, stirring until smooth. Remove from heat and put it aside to cool to room temperature. In a bowl, whip the egg whites until stiff peaks form.
- Whisk the egg yolks with granulated sugar and salt in another mixing bowl until pale and fluffy. Mix the chocolate mixture into the egg yolk mixture, stirring until well combined. Gently whisk the beaten egg whites into the chocolate mixture until no streaks remain.
- Pour the chocolate mousse mixture into a whipped cream dispenser and charge it with a charger. Shake the dispenser vigorously for a few seconds to mix the gas with the liquid.
- Dispense the chocolate mousse into serving cups or glasses and chill in the refrigerator for at least 1 hour. Serve the chocolate mousse chilled, garnished with whipped cream or fresh berries if desired.

CARAMELIZED FOAMED MILK

20
MIN

2
SERVINGS

Ingredient

- 1 cup whole milk
- 2 tbsp. caramel sauce
- Optional: whipped cream, additional caramel sauce for drizzling

Equipment:

- Whisk or hand mixer
- Whipped cream dispenser

Instruction

- Pour the milk into a small saucepan and place it over medium heat. Warm the milk occasionally until it reaches 140-160°F (60-70°C). Remove the milk from the heat and add 2 tablespoons of caramel sauce.
- Whisk or stir the caramel sauce until it is well combined with the milk. Use a whisk or hand mixer to froth the milk until it is light and airy. You can also use a frothing wand or a French press to create frothy milk.
- For a finer and more stable foam, pour the frothed milk into a whipped cream dispenser, and charge it with a whipped cream charger. Shake the dispenser vigorously for a few seconds to mix the gas with the milk.
- Dispense the foamed milk into a coffee mug. Top with more whipped cream and caramel sauce if desired.

HOT CHOCOLATE SHAKE

20
MIN

4
SERVINGS

Ingredient

- 2 cups (480 ml) milk
- ½ cup (120 ml) heavy cream
- ¼ cup (20 g) cocoa powder
- ¼ cup (50 g) granulated sugar
- 1 tsp. vanilla extract
- Pinch of salt
- Whipped cream and chocolate shavings for topping

Equipment:

- Blender
- Whipped cream dispenser

Instruction

- Combine the milk with heavy cream, cocoa powder, sugar, vanilla extract, and salt in the food blender. Blend until smooth. Pour the mixture into the whipped cream dispenser. Charge the dispenser with a whipped cream charger according to the manufacturer's instructions.
- Shake the dispenser vigorously for a few seconds to mix the gas with the mixture. Dispense the hot chocolate shake into a glass. Top with whipped cream and shaved/grated chocolate, if desired. Serve immediately and enjoy!

INFUSED OIL FOR SALAD AND PASTA

35
MIN

1 cups
SERVINGS

Ingredient

- 1 cup of oil (such as olive oil or sunflower oil)
- 3 sprigs of fresh herbs (such as rosemary, thyme, or basil)
- 1 garlic clove, peeled and crushed (optional)
- Salt and pepper to taste

Equipment:

- Whipped cream dispenser
- Whipped cream charger
- Fine mesh strainer

Instruction

- Add the oil, herbs, garlic, salt, and pepper to the whipped cream dispenser. You can use a funnel to make this easier. Screw the lid of the whipped cream dispenser tightly. Charge the whipped cream dispenser with a whipped cream charger according to the manufacturer's instructions.
- Shake the whipped cream dispenser vigorously for a few seconds to combine the ingredients. Allow the infused oil to steep in the whipped cream dispenser for at least 30 minutes, occasionally shaking to help the flavors infuse.
- Once the oil is infused to your desired level, release the pressure in the whipped cream dispenser by turning it upside down and pressing the trigger until all the gas is expelled. Remove the lid from the whipped cream dispenser and strain the oil through a fine mesh strainer to remove the herbs and garlic.
- Transfer the infused oil to the mason clean jar or bottle and store it in a cool, dark place until ready to use. Pour infused oil (per your taste) over salad and pasta dishes. Serve and enjoy.

HOMEMADE SODA FOR HOME PARTY

70
MIN

4
SERVINGS

Ingredient

- 1 liter of cold water
- ½ cup of granulated sugar
- ½ cup of fresh fruit juice (such as orange, lemon, or lime)
- 1 whipped cream charger
- Ice cubes

Equipment:

- Whipped cream dispenser
- Fine mesh strainer

Instruction

- Combine the cold water and sugar in a large bowl. Stir until the sugar is dissolved. Add the fresh fruit juice to the sugar water mixture. Stir to combine. Pour the mixture into the whipped cream dispenser.
- Screw the lid of the whipped cream dispenser tightly. Charge the whipped cream dispenser with a whipped cream charger according to the manufacturer's instructions. Shake the whipped cream dispenser vigorously for a few seconds to mix the gas with the liquid.
- Refrigerate the whipped cream dispenser for at least 1 hour to allow the gas to dissolve into the liquid. Once the mixture is chilled and infused with gas, remove the whipped cream charger, and shake the dispenser again.
- Hold the dispenser upside down to dispense the soda and press the trigger. The soda will come out in a stream. Strain the soda through a fine mesh strainer to remove pulp or solids. Serve the soda over ice.

CONCLUSION:

In conclusion, Paymana whipped cream dispenser is versatile and convenient for creating whipped cream, flavored syrups, infused oils, frothed milk, and other toppings and sauces. With various models available on the market, it's easy to find our whipped cream dispenser that fits your needs and preferences.

Using our whipped cream dispenser can also have potential health benefits, such as portion control, lower sugar content, better quality ingredients, a source of calcium, and versatility in creating a range of toppings and sauces. However, it's important to use moderation and balance in your diet, even when using a whipped cream dispenser.

When using our Paymana whipped cream dispenser, following the manufacturer's instructions carefully is important to ensure safety and optimal results. Some general tips include using cold ingredients, shaking the dispenser well before use, and cleaning the dispenser thoroughly after each use.

Whether you're using Paymana whipped cream dispenser to create traditional whipped cream, frothed milk for coffee, or infused oils for cooking, this tool is a fun and creative way to add flavor and texture to your favorite foods and drinks. With a little experimentation and creativity, the possibilities are endless.

In addition to the benefits and uses mentioned above, our whipped cream dispenser can be an eco-friendly choice for those looking to reduce their waste. Using a whipped cream dispenser to make your own whipped cream and other toppings, you can avoid purchasing pre-made options in single-use packaging. Additionally, you can control the ingredients and choose organic, sustainable, or local options to make your creations even more environmentally friendly.

Paymana whipped cream dispenser can also be a great tool for entertainment, allowing you to impress your guests with delicious and unique toppings and sauces. With the ability to create custom flavors and infusions, a whipped cream dispenser can take your hosting game to the next level.

Our whipped cream dispenser is a fun and versatile tool to enhance your cooking and baking experiences. Whether you're using it to create classic whipped cream, frothed milk for coffee, or unique infusions and sauces, a whipped cream dispenser is a worthwhile investment for anyone who loves experimenting in the kitchen.

Thank you for choosing Paymana's Whipped Cream Dispenser. We hope it has been the cherry on top of your kitchen experience. Your order means everything to us, and we would love to hear your thoughts. Please share your feedback and leave a review to help us keep spreading sweetness.
